May 2006 (High Blood Pressure Month) Nutrition for Hypertension: According to recent estimates, nearly one in three U.S. adults has high blood pressure, but because there are no symptoms, nearly one-third of these people don't know they have it. In fact, many people have high blood pressure for years without knowing it. Changes in dietary intake, including intake adjustments of certain nutrients and foods, may benefit those with hypertension or pre-hypertension. This month's packet summarizes these dietary recommendations including the DASH diet.

Hardcopies of the hypertension packet will be available at all medical and fitness facilities. If you or your department/organization would like to be added to the monthly packet hardcopy distribution list, please call Kris Calderon at 867-3414.
